

# Metalex® RA-30

## (Features)

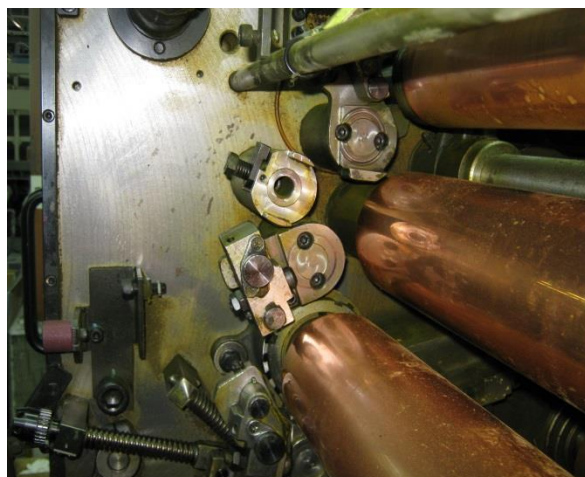

Metalex® RA-30 is a cleaner based on a high flash point water-soluble solvent.

It is particularly effective for removing inks, including oily ink and UV ink, and oily stain. Previously, a chlorinated solvent or a low boiling point petroleum based solvent was generally used for removing ink stain, but Metalex® RA-30 has less effect on human bodies and environment than those previously used solvents, and with its high safety feature contributes to improvement of the working environment.
